

Job Title: Senior Python Developer

Location: Remote

We are seeking an experienced Python developer to build scalable backend services. You will design APIs, optimize database queries, and mentor junior engineers.

Requirements:

- 5+ years of Python experience
- Proficiency with FastAPI or Flask
- PostgreSQL database experience
- Docker and container orchestration
- AWS cloud experience
- CI/CD pipeline setup

Nice to have:

- Redis caching
- Testing frameworks
- Microservices architecture
